TROPICAL CYCLONE BULLETIN NR. 17
Tropical Storm ADA (NOKAEN)

Issued at 11:00 PM, 17 January 2026
Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

"ADA" MAINTAINS ITS STRENGTH AS IT MOVES SLOWLY OVER THE SEA EAST OF SOUTHERN LUZON

Location of Center (10:00 PM)

The center of Tropical Storm ADA was estimated based on all available data at **120 km North Northeast of Virac, Catanduanes or 315 km East of Infanta, Quezon (14.6°N, 124.6°E).**

Intensity

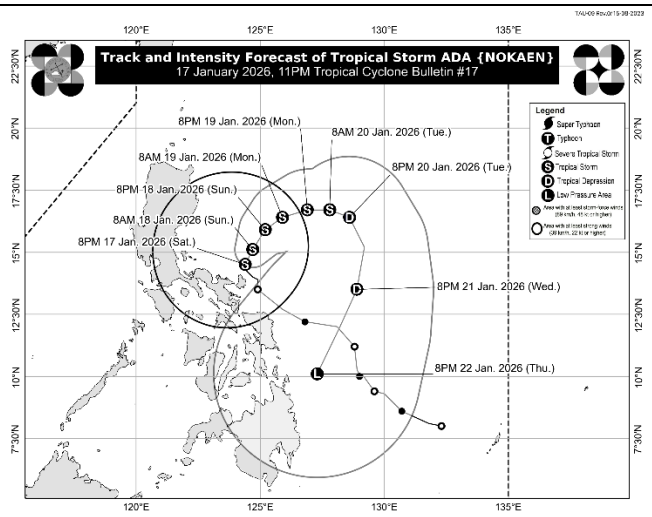
Maximum sustained winds of **85 km/h** near the center, gustiness of up to **105 km/h**, and central pressure of **994 hPa**

Present Movement

Northeastward Slowly

Extent of Tropical Cyclone Winds

Strong to gale-force winds extend outwards up to **440 km** from the center



TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)

Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 15 issued at 11:00 PM today for the heavy rainfall outlook due to Tropical Cyclone ADA.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Since further intensification to severe tropical storm is not ruled out, raising of Wind Signal No. 3 is possible.

The Northeast Monsoon and the periphery of ADA will also bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Batanes, Babuyan Islands, Ilocos Norte, northern and eastern mainland Cagayan, Isabela, Quirino, Quezon, Romblon, Aklan, Capiz, northern Cebu, Eastern Visayas, and Dinagat Islands
- **Tomorrow (18 January):** Batanes, Cagayan, Isabela, Quirino, Ilocos Norte, Abra, Aurora, Quezon, Marinduque, Romblon, Bicol Region, and Northern Samar
- **Monday (19 January):** Batanes, Cagayan, Isabela, Ilocos Norte, Abra, Aurora, Camarines Norte, Camarines Sur, and Catanduanes.

Coastal Flooding

There is a **minimal to moderate risk of storm surge** with peak heights **reaching up to 2.0 m** within the next 48 hours over the low-lying or exposed coastal communities of Camarines Norte, Camarines Sur, Catanduanes, Albay, Sorsogon, Masbate, Northern Samar, and Eastern Samar. **Refer to Storm Surge Warning No. 9 issued at 8:00 PM today for more details.**

Tropical Storm ADA (NOKAEN)
Issued at 11:00 PM, 17 January 2026
Valid for broadcast until the next bulletin at 5:00 AM tomorrow.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the eastern seaboards of Southern Luzon. For more details, refer to Gale Warning No. 5 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 5.5 m:** The northern seaboards of Camarines Sur and Catanduanes
- **Up to 5.0 m:** The seaboard of Camarines Norte
- **Up to 4.5 m:** the eastern seaboards of Polillo Islands and Catanduanes
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The eastern seaboard of mainland Cagayan, the seaboards of Isabela and northern Aurora;
- **Up to 3.5 m:** The eastern seaboard of Babuyan Islands; the northern and western seaboards of Polillo Islands; the remaining seaboards of Aurora.
- **Up to 3.0 m:** The seaboards of Batanes, Ilocos Norte, and Northern Samar; the eastern seaboards of Albay and Sorsogon; the remaining seaboard of mainland Cagayan and Babuyan Islands.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The eastern seaboard of Eastern Samar
- **Up to 2.0 m:** The seaboards of Romblon, Marinduque, and Kalayaan Islands; the northern and eastern seaboards of Siargao-Bucas Grande Islands; the western seaboards of mainland Palawan; the remaining seaboard of Ilocos Region, Quezon, Bicol Region, and Northern Samar.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Other coastal waters have wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- ADA is forecast to move generally northeastward from tonight until tomorrow (18 January). From tomorrow onwards, ADA is forecast to follow a looping track over the sea east of Luzon.
- Changes in forecast track over the succeeding bulletins is possible.
- ADA is forecast to remain as a tropical storm while moving over the sea east of Luzon. However, further intensification to severe tropical storm is not ruled out. This tropical cyclone will then weaken into a tropical depression by Tuesday (20 January) afternoon or evening due to the effects of the surge of the northeast monsoon.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 AM tomorrow.
